

# Redfern**Online**MIS

Access your own Online Travel Management Information Statistics (MIS).

## WHAT IS THE POINT?

We capture and store the travel details of all journeys booked with us. We can now make this data available on a secure website. You can use the same technology that our consultants use in-house to run pre- and post-trip analysis of the travel arrangements made by your company.

Need to check to see who is booked to fly to any destination on business next week? Need to see how much your company spent on air fares last week? Need to see how much money Redfern Travel's special nett fares saved you last quarter? Can't sleep and need to look at your travel data in the middle of the night? - No problem, all of this and more is available 24/7 via RedfernOnlineMIS.

## SO HOW DOES THIS HELP ME?

Actually in lots of ways:

### Pre-Trip and during a Trip

- In the event of a disaster such as 9/11, your personnel department are quickly able to log in and see which employees you have where.
- Your travel compliance officer can look to see who has made reservations to travel in the future and use this data to combine trips, avoid possible duplication and thereby SAVE MONEY.
- Identify trips where Advanced Purchase Tickets may be used to obtain lower fares.
- Your travel compliance officer can see who may be booked to travel outside of policy (eg in business class instead of economy).
- Redfern Travel uses pre-Trip reports to identify trends and uses this information to negotiate better fares and sometimes group fares.

### Post-Trip

- Your Purchasing Department and Finance Director can see how much you spent and on what you spent it.
- With Redfern Travel you can use this data to consolidate your travel spend with chosen suppliers, negotiate better rates and loyalty rewards and SAVE MONEY.
- Your Purchasing Department can benchmark the value of the tickets you have purchased against the cheapest fares available on each route and see the reasons why cheaper fares may have been declined.

**And much more, for screenshots see the reverse →**

## ON SCREEN EXAMPLE

This screenshot shows a Cost Savings Analysis Report. It shows the amount spent for a given period of time on Air Tickets, Rail Tickets, Car Hire, Hotels etc sorted by Airline, Hotel etc and sub-sorted by traveller. For each transaction the amount paid is compared to the lowest and full fare rates available at the time of booking with the percentage savings noted. This report is the benchmark report for most clients, it proves how much the advice of Redfern Travel is saving your company.
